Effective communicator, collaborative team player, and committed to continuous learning. Seeking opportunities to contribute to innovative software projects and deliver exceptional results.

Professional Experience

Frontend/Kony Developer, ITSS Global

04/2021 – 05/2023

Geneva, Switzerland

- API/UI walkthrough with other developers and Testing api end points
- Analyzing business requirement.
- Creation of fabric Operation and Services
- Development of business logic based on requirement
- Exposing Transact API in Quantum Fabric based on business logic
- Creation of UI component and templates for re-usability
- Integration of fabric services and operation on visualizer
- Quantum Visualizer UI/UX development for different modules, which involves translating figma screen designs to various Quantum Visualizer components.
- UI Component Validation

I was responsible for leveraging my expertise in Quantum Visualizer to create seamless user interfaces and enhance the overall user experience. Throughout my tenure, I actively collaborated with cross-functional teams, translated design concepts into components.

A crucial aspect of my role involved immersing myself in the business process and comprehending the application requirements. By doing so, I developed a comprehensive understanding of the clients' needs, which served as a solid foundation for my subsequent work

Javascript Developer, Huawei

09/2020 – 03/2021

Lagos, Nigeria

- I was made project owner for Airtel Tigo tenant and tasked with assigning and fixing ticket related to the tenant.
- Collaborate with cross-functional teams, including developers, testers, and business analysts, to ensure seamless integration and deployment of new requirements.
- I Created responsive layout & pages based on client's requirements.
- I wrote scripts as per client requirements and provided customer support.
- Conducted regular testing and quality assurance to validate the functionality and performance of the automation solutions.

Frontend Developer, Cyberticks

02/2020 – 08/2020

Lagos, Nigeria

- Collaborate with developers to ensure seamless implementation of the designed interfaces.
- I developed the UI screens for a school management system
- Optimize designs for responsiveness, making sure the websites are accessible and user-friendly on various devices, including mobile phones.

- Develop wireframes, prototypes, and interactive mockups to effectively communicate design ideas and concepts.
- Strengthen the company's brand and identity by designing and implementing the company's website.
